

To find the relationship between two people, first determine the common ancestor you share and your relationship to the common ancestor: grandchild, great grandchild, etc. Pencil in the common ancestor's name, if it helps.

- Choose Person #1's relationship to that ancestor from the top row of boxes, e.g. "child."
- Choose Person #2's relationship to that ancestor from the left column of boxes, e.g. "grandchild."
- The box where the two intersect identifies the relationship between the two people in this case: Niece/Nephew.
